

IEEE Journal of Oceanic Engineering

Call for papers

Special Issue on Underwater Communications and Networking 2018 (UComms18)

The Journal will publish a Special Issue focusing on leading-edge research and developments in the domain of Underwater Communications and Networking, following UComms18, a conference hosted by the NATO STO Centre for Maritime Research and Experimentation, held in Lerici, Italy, 28 - 30 August 2018.

The Special Issue is open to contributed papers that are expansions of the short papers presented at the conference.

Guest Editors:

João Alves
NATO STO CMRE
La Spezia, Italy
joao.alves@cmre.nato.int

John Potter
Independent Consultant
La Spezia, Italy
Dr.John.R.Potter@gmail.com

Milica Stojanovic
Northeastern University
Boston, MA, USA
millitsa@ece.neu.edu

Deadline for submission of papers: January 14, 2019. Manuscripts submitted at any time before this date will be considered for publication in the Special Issue. All manuscripts must be submitted through the Journal's website: <http://joe.msubmit.net> in the normal way.

Authors should include a cover letter when submitting their manuscript indicating that the contribution is intended for the "**UComms18 Special Issue**". If the authorship deviates from the short paper presented at UComms18 and published in IEEE Xplore, the changes should be described and explained.

The editors strongly encourage the authors to consider supporting JOE efforts to publish reproducible results through sharing of code and data. This way other researchers can build upon your work and your contributions will have higher impact in our community, increasing the value of your paper and potentially increasing citation rate.

Individual papers will be posted on IEEE Xplore immediately on approval of the final galley proof, thus becoming downloadable and citable in advance of publication in the regular issue of the Journal.

Proposed target date for publication: October 2019
